Serial Number: 10/042,687

Art Unit: 3654

Applicant: Ridgeway, Jr., et al.

Amendments to the Specification:

On page 5, at line 2, please add the following:

Figure 3 is an exploded view of a reel for packaging having corrugated side walls.

On page 5, the paragraph beginning at line 4, should be amended to read as follows:

The reel package of the present invention comprises opposing sidewalls 2,4 or flanges formed of the specified or appropriate substrate. The sidewalls 2,4 or flanges may be formed of paper, styrofoam, wood or other suitable material. Figure 1. The sidewalls 2,4 or flanges may be formed of corrugated material, including corrugated paper. Figure 3. The sidewalls are connected by a core 6 formed of polyurethane. The core is formed or molded by preparing a partition, which may be a ring 8. The ring may be made of paper or other suitable material, which is filled with a flowable material 10, and acts as a mold, and forms the flowable material.
